

## Font Book Exercise

### OVERVIEW

We will create a font book that represents the 5 generic types of fonts that are used.

### OBJECTIVE

To understand the five generic font types that are widely used; Serif, Sans Serif, Monospace, Fantasy, and Cursive.

### INSTRUCTIONS

1. Open up an 8.5" x 11" Word document. Create 1" margins all around. Save it as TypeExercise(Your Initials).

2. On the first line of the document type the work Sans Serif in 12pt Arial Font. Center the text.

3. You will find 10 Sans Serif fonts. Type the name of each font on an individual line in a 36pt type size (For Example: This is Arial.) Use a line spacing of 1.15, so each line has space between them.

**You may download free fonts- [www.dafont.com](http://www.dafont.com)**

**Try to have your font name fit on one line!**

**Do not pick fonts that do not make sense or have weird characters in them!**

4. After you have 10 Sans Serif fonts on the first page, go to the next page and do the same thing for Serif fonts. (Find 10 different Serif fonts and list each one a different line in a 36pt type size, also using 1.15" line spacing) Then continue doing the same thing on a new page for Cursive Fonts, Fantasy Fonts, and Monospace Fonts.

5. You will now have 5 different types of font pages each representing the 5 generic font types. Save and print the pages. Submit your work.

Sans Serif

This is Arial.

This is Avenir.

**THIS IS BIG JOHN.**

This is Century Gothic.

This is Futura.

This is Geneva.

This is Helvetica.

This is Myriad.

This is Skia.

This is Verdana.
